

Barth Syndrome Month of May Awareness Campaign

Featured Story: A Personal Message from Ben Thorpe

“...When a Barth sufferer gets sick, it doesn’t only affect him but affects everyone around him too, from family to friends. By finding a cure you will not only be helping the sufferer but also his family and friends. When a Barth sufferer passes away, it is not only traumatizing for his family but also for all his friends who also suffer with Barth syndrome and their family members in the Barth syndrome community.” ~ Ben Thorpe, South Africa
