

Barth Syndrome
Foundation

Quote of the Day:

“Through BSF we learned that there were adults with Barth syndrome alive, married, having children of their own. From that moment on we realised that my son might reach adulthood and have a future. I can't describe in words what that meant to us, it is huge.” ~ Jo, Mother of Diagnosed Son, The Netherlands

Featured Story: A Personal Message from Peter's Family

Peter

The Barth Syndrome Foundation gave my son a future. When he was diagnosed in 1989, we didn't expect him to reach his next birthday. More than 20 kids in our family passed away before their 3rd birthday, and my son was two years old when he was diagnosed.

Barth Syndrome Foundation
